Once the server is started, you can disconnect your device Full mouse and keyboard.. - supports Java enabled browsers You can connect to the android device from a browser using a Java applet - supports HTML5 compatible browsers, you can connect to your android device without any other installations - supports auto rotation and remote rotation - supports navigation bar at bottom with special key, Home, Back, Menu, etc.. If you don't turn your device off (but just let it 'sleep'), then the server will continue running for months, if desired.. This app works on rooted and non-rooted android devices However, for non-rooted devices, every time after turning the device completely off and on, you will have to connect your device to a Windows PC or Mac using a USB cable, then run a free desktop program, VMLite Android App Controller, to start the server on your device.
